SUMMARY

Ambitious and results-driven Full-Stack MERN Developer and Database Specialist with professional experience building scalable web applications, modern frontend interfaces, and managing relational and non-relational database layers. Adept at database modeling, schema optimization, and collaborative technical project execution. Demonstrated engineering excellence through competitive nationwide runner-up hackathon recognition at IIT Kanpur. Passionate about structuring highly optimized frontend components, handling complex SQL queries, and deploying robust production systems.

TECHNICAL SKILLS

Frontend & UI Technologies: React.js, Next.js, Redux, HTML5, CSS3, Responsive UI/UX Design, Cross-Browser Compatibility

Database Technologies: MongoDB, MySQL, Mongoose ODM, PostgreSQL Fundamentals, SQL Query Optimization, Indexing, Schema Design, Data Modeling

Languages & Frameworks: JavaScript (ES6+), SQL, Node.js, Express.js, Python (Fundamentals)

Tools & Platforms: Git, GitHub, Vercel, RESTful APIs, JSON, npm, Jupyter Notebook

Concepts: MVC Architecture, Component-Based Design, State Management, CRUD Operations, Aggregation Pipelines, Server-Side Pagination, Database Middleware

EXPERIENCE & CONTRIBUTIONS

AXIU

[axiu.space](#)

Founder, Lead Developer & Frontend Collaborator | Active

- Architected and deployed high-performance web applications and custom Minimum Viable Products (MVPs) utilizing React.js, Next.js, and Python backend frameworks.
- Contributed to the frontend development of the official AXIU web platform, implementing responsive layouts and optimizing UI elements for premium user experiences.
- Designed and structured flexible database layers utilizing MongoDB to manage real-time client resource allocation engines and platform architecture layouts.
- Led cross-functional team operations, handling developer onboarding, task distribution, and production deployment cycles for client deliveries.

Pegasus Technologies & Software Pvt. Ltd.

Nagpur, MH

MERN Fullstack Developer Intern | Jan 2024 – May 2024

- Successfully completed an intensive internship program specializing in full-stack module design and architectural implementation.
- Gained robust, hands-on development expertise integrating front-end interactive modules with MongoDB, Express.js, React.js, and Node.js codebases.
- Collaborated closely with senior engineers to construct, unit-test, and patch complex production features for live software and client deliverables.
- Commended by the Managing Director for superior performance, exceptional technical sincerity, and delivering production-ready, clean source code.

KEY PROJECTS (PRODUCTION & LIVE LINKS)

Crestfield Law Group Platform (Frontend Development)

[Live Link](#)

React.js, CSS3, JavaScript

- Developed a sleek, corporate frontend platform tailored for a professional legal practice environment.
- Engineered a production-ready responsive layout maximizing readable topography and consistent cross-device accessibility parameters.

CoCrumble Web Application (Frontend Development)

[Live Link](#)

React.js, Component-Based Architecture, Custom Layouts

- Built an independent, modern frontend user interface featuring custom navigation modules and highly interactive elements.
- Structured scalable, decoupled frontend components ensuring easy integration with prospective backend services.

Car WebO - Automotive Showcase (Frontend Development)

[Live Link](#)

React.js, Responsive Design, Asset Optimization

- Created a dynamic, rich-media frontend interface focused on interactive asset presentation and clean search filtration designs.
- Applied lazy loading and media optimization parameters to guarantee rapid layout delivery metrics across standard mobile environments.

E-Commerce Admin Dashboard (Frontend Development)

React.js, Redux, REST APIs, HTML5, CSS3

- Designed and developed a feature-rich, high-performance web admin dashboard UI for managing products, real-time inventory stocks, and client orders.
- Centralized complex frontend state management using Redux, completely eliminating props-drilling footprints and elevating component reusability by more than 40%.
- Consumed RESTful APIs to cleanly render real-time sales analytics dashboards, interactive inventory counts, and client order tracking data.

MongoDB-Backed REST API & Personal Portfolio

Node.js, Express.js, MongoDB, Mongoose, CSS3

- Designed and implemented an optimized MongoDB schema layer to reliably persist client contact inquiries and dynamic developer portfolio metadata.
- Built modular RESTful backend routes using Mongoose ODM, ensuring strict object-level validation parameters and reliable data integrity bounds.
- Applied explicit database indexes on heavily traversed querying fields, scaling overall read execution speeds by approximately 30%.
- Engineered fully responsive, mobile-first interactive UI architectures natively through React with zero reliance on bulky third-party libraries.

EDUCATION

Vishwakarma University

Pune, MH

Master Of Computer Applications (MCA) | 2025 – 2027

- Current CGPA: 8.55 (Result Awaited)

G H Raisoni Institute of Engineering and Technology

Nagpur, MH

Bachelor of Computer Applications (BCA) | 2021 – 2024

- Graduated with a cumulative CGPA of 6.21
- Relevant Coursework: Database Management Systems (DBMS), Structured Query Language (SQL), Data Structures and Algorithms, Web Technologies, Operating Systems

Saraswati Junior College

Nagpur, MH

Higher Secondary Certificate (HSC) – Science | 2019 – 2021

- Aggregated Score: 87.67%

Banarasidas Ruiya High School

Katol, MH

Secondary School Certificate (SSC) | Completed 2019

- Aggregated Score: 56.40%

CERTIFICATIONS & ACHIEVEMENTS

- **Second Runner-Up, Pitch Premier** – IIT Kanpur (March 2026): Achieved 3rd place nationwide at Techkriti'26, presenting an innovative software architectural blueprint and business pitch to industry experts.
- **Techkriti Innovation Challenge Participant** – IIT Kanpur (March 2026): Selected to compete in the final national innovation ecosystem tracks at the annual tech festival.
- **Full-Stack Development & Technical Leadership Certificate** – AXIU: Certified for coordinating architectural milestones, database schema lifecycles, and frontend module releases.
- **MERN Fullstack Training & Internship Completion Certificate** – Pegasus Technologies & Software Pvt. Ltd. (2024).
